AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, Pandas, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift, RDS), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), Prefect
-**CI/CD**: Git, GitHub Actions, CI/CD pipelines, DataOps, Agile/Scrum, Kanban, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, OLTP Design, OLAP Design, Schema Migration, Partitioning, Indexing, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Led **Python**-based **ETL** pipeline delivery on **AWS**, integrating 100+ source systems into centralised warehouses and establishing **DataOps** standards covering **Git** branching, **CI/CD**, and schema migration management.
- Led end-to-end data platform migration from legacy **Redshift** architecture to new warehouse schemas, delivering **ELT** pipelines and **CI/CD** automation with **automated testing** suites, cutting deployment errors by 40%.
- Engineered **Python** and **Apache Airflow** orchestrated **ETL** workflows using **Pandas** for data transformation, processing 5-8 TB daily on **AWS** infrastructure with automated data quality monitoring.
- Designed and implemented AI engineering patterns and **Looker API** integrations with **semantic layer** abstractions, enabling Gen AI-powered self-service analytics for 150+ non-technical business stakeholders.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected **Python**-based **ETL** pipelines on **AWS** with **CDC** ingestion and **Apache Airflow** orchestration, supporting **OLTP** and **OLAP** workloads for trading desks processing 250+ TB of market data.
- Developed advanced **SQL** and **Python**/**Pandas** reconciliation and transformation pipelines for pre-trade market data (prices, positions, exposures, curves), supporting P&L reporting and VaR analysis.
- Established **DataOps** standards and conducted rigorous code reviews for junior engineers, elevating **Python** and **ETL** best practices while delivering Power BI dashboards for 30+ front-office stakeholders.
- Provided **L3** production support, authored technical documentation, developed **Python** hotfixes for incidents, and mentored junior developers on **Git** workflows and data engineering best practices.
enabling informed decision-making for Analysts.
- Integrated regulatory datasets (REMIT, EMIR) into governed **AWS**-managed data models, enforcing lineage, auditability, and compliance; translated complex regulatory requirements into scalable technical roadmaps.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **ETL** pipeline design ingesting from **NoSQL** microservice data sources into analytical data stores using **Azure** ADF, **Databricks**, **PySpark**, reducing infrastructure costs by 80%.
- Reported to CTO as technical lead, translating complex business requirements into strategic data platform roadmaps and delivering reconciliation dashboards supporting 1M+ daily fintech transactions.
- Designed **Agile/Scrum** and **Kanban**-driven **ETL** pipelines via **Azure Data Factory** with **CI/CD** and schema migration management, delivering reliable SLA-compliant data to the analytics warehouse.
- Mentored and coached junior engineers on **Python**, **Git** branching workflows, and **DataOps** practices through code reviews and workshops; led **Data Vault 2.0** modelling reducing redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **AWS Redshift** and **Azure Synapse** data warehouse migrations with **automated testing** suites, **CI/CD** pipelines, and workload isolation ensuring **OLAP** performance and SLA compliance.
- Designed **OLAP** warehouse schemas with **physical modelling**, partitioning, and indexing best practices on **AWS** S3, integrating **NoSQL** and semi-structured feeds via **Python ETL** into analytics pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape using **Agile/Scrum** and **Kanban**; authored **SQL** transformations and built incremental **ETL** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
