LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Databricks, Data Factory, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, L3 Support
-**Data techniques**: ETL, ELT, Event-Driven Architecture, Data Modelling, Physical Modelling, ML Data Foundations, Data Integrity, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage, GDPR

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Architected event-driven **ELT** ecosystems using **Kafka** and **dbt** to process high-volume communication flows from 100+ source systems into a centralised **Snowflake** warehouse handling 120+ TB with full data integrity.
- Designed AI-ready and **ML**-enabling data foundations in **Snowflake** with **dbt** transformation layers and **semantic layer** abstractions, powering Gen AI-driven analytics for 150+ users with production-grade traceability.
- Built from-scratch **ELT** pipelines using **Python** and **SnowSQL** on **AWS**, processing 5-8 TB daily from operational systems with automated data quality controls, security frameworks, and lineage tracking.
- Delivered **Looker API** self-service analytics and **CI/CD** pipelines enabling product and data science teams to build independently on clean, reusable **Snowflake** datasets with consistent, reliable outputs.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected resilient **ELT** ecosystems with **Kafka**-driven event-driven **CDC** ingestion and **Apache Airflow** orchestration in **Snowflake** and **dbt**, ensuring data integrity across 250+ TB of regulated market data.
- Developed **Python** and **SQL** transformation pipelines producing clean, reusable datasets from pre-trade market data (prices, positions, curves), enabling analytics, **ML** experimentation, and VaR analysis.
- Built rules-engine-driven data quality controls and Power BI dashboards enforcing data integrity and auditability across regulated datasets for 30+ front-office and risk stakeholders.
- Owned architectural decisions for **Snowflake** data platform; provided **L3** support, developed **Python** hotfixes, and mentored junior engineers on production-grade **ELT** and data modelling best practices.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into **Terraform**-managed **Snowflake** data models, enforcing data integrity, security controls, lineage, and compliance across all regulated reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led from-scratch **ELT** pipeline design with event-driven **CDC** ingestion using **Azure** ADF, **Databricks**, **PySpark**, processing transaction communication data at scale and reducing infrastructure costs by 80%.
- Reported to CTO as engineering lead, collaborating cross-functionally with product and data teams to translate communication data into high-impact fintech dashboards serving 1M+ daily user decisions.
- Designed greenfield **ELT** pipelines from scratch via **Azure Data Factory** with **CI/CD**, data integrity controls, and security frameworks, delivering reliable, reusable data products to the analytics warehouse.
- Mentored engineers and led **Data Vault 2.0** physical modelling implementation, building clean, reusable datasets with rules engines forming strong data foundations for **ML** and advanced analytics use cases.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered production-grade **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** migration, implementing workload isolation and data integrity controls ensuring 99.9% SLA compliance.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured event data (JSON, Parquet) using **physical modelling** best practices, integrating IoT/supply-chain feeds via **ELT** into analytics pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape; authored **Python** and **SQL** transformations and built incremental **ELT** pipelines from scratch, loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
