LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, LookML, Looker, Looker API, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Incremental Modelling, Data Modelling, Physical Modelling, Metric Definitions, Data Quality, Regression Testing, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage, Data Documentation

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Owned the transformation layer end-to-end, writing and maintaining production-quality **dbt** models with incremental modelling strategies integrating 100+ source systems into a **Snowflake** warehouse processing 120+ TB.
- Led **dbt** platform migration establishing **Snowflake** schemas, **CI/CD** pipelines, and **automated testing** standards to prevent regressions, ensuring data correctness and reliability across all transformation layers.
- Built **ELT** pipelines and proactive data quality monitoring frameworks using **Python** on **AWS**, processing 5-8 TB daily and investigating data issues before they reached downstream consumers.
- Designed **Looker** dashboards and **LookML** metric definitions via the **Looker API**, enabling partner-facing self-service analytics for 150+ users with trustworthy, externally-reliable consistent data.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Owned the **dbt** data domain end-to-end, architecting **ELT** transformation pipelines in **Snowflake** with **CDC**-based ingestion and **Apache Airflow** orchestration, delivering trusted datasets across 250+ TB.
- Developed production-quality **SQL** and **dbt** transformation models defining consistent metric logic and KPI definitions for pre-trade market data (prices, positions, curves), supporting P&L and VaR reporting.
- Built **Looker**-backed data quality dashboards and rules-engine-driven regression testing standards for 30+ external front-office stakeholders, treating data correctness as non-negotiable across all outputs.
- Authored comprehensive **dbt** model documentation, translated complex data quality issues to non-technical stakeholders, and mentored junior engineers, raising the team's analytics engineering standards.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with lineage, auditability, and **automated testing** standards, ensuring data reliability for client-facing regulatory reporting.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Owned end-to-end transformation layer and **CDC**-based data domain for AMETA, building well-documented **dbt**-style models in **Azure** ADF, **Databricks**, **PySpark**, reducing external tooling costs by 80%.
- Reported to CTO as engineering lead, collaborating with product and customer success stakeholders to define metric logic and KPI frameworks for a partner-facing fintech dashboard serving 1M+ daily decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines with incremental modelling patterns, **automated testing **standards, and** CI/CD** to prevent regressions and ensure data correctness for all downstream consumers.
- Mentored engineers and authored well-documented **Data Vault 2.0** data models with rules engines for quality enforcement, reducing data redundancy by 45% and enabling reliable self-serve analytics.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and incremental **ELT** pipelines for BAT's **Snowflake** migration with **CI/CD**, ensuring data correctness and regression-free delivery across all downstream consumers.
- Designed documented **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet), applying **physical modelling** best practices to produce trusted, reusable datasets for analytics consumers.
- Authored production-quality **SQL** transformations for AMD Malaysia data warehouse migration, building incremental **ELT** pipelines with consistent metric definitions loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
