LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, GCP (Vertex AI), Azure (Data Factory, Databricks, Synapse), Terraform
-**Data Engineering Tools**: DBT, Apache Airflow (DAGs), Fivetran, Kafka, PySpark, Data Vault 2.0, CDC, ELT, Looker, Looker API, MLOps, Model Deployment Pipelines, Model Registry, Experiment Tracking, Model Versioning
-**CI/CD**: Git, CI/CD pipelines, DevOps, Automated Testing, Code Reviews, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Data Warehousing, Data Governance, PII Management, Data Masking, Access Control, Data Lineage, Data Catalog, Data Quality, Data Integrity, Physical Modelling, Data Ingestion, Data Migration, Streaming, CDC, Reconciliation, Semantic Layers, Observability, Self-Service Analytics, Near-Real-Time Inference, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and developed **dbt** data models with **Python**-driven **ELT** pipelines integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB with comprehensive **data quality** testing.
- Led end-to-end **dbt** platform migration, establishing **Snowflake** target schemas, **ELT** pipelines, and **CI/CD** workflows with **automated testing**, setting engineering standards across the data platform team.
- Automated **ETL/ELT** workflows using **Fivetran**, **Python**, and **Apache Airflow** DAG orchestration on **Terraform**-provisioned **AWS**, with **observability** frameworks ensuring pipeline reliability and data quality.
- Designed and deployed **Gen AI** and **ML** model pipelines using **MLOps** best practices and **AI**-assisted development tools, establishing model deployment, registry, and versioning for production AI workloads over **Snowflake**.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ETL/ELT** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Apache Airflow** DAG orchestration, delivering trusted **data warehouse** foundations for trading, settlements, and risk.
- Developed advanced **SQL** and **Python** transformation models for pre-trade and market data, ensuring **data quality**, integrity, and security across high-volume financial data workflows and pipelines.
- Built rules-engine-driven **data quality** frameworks with **observability** and **data lineage** controls, ensuring **data integrity** and compliance for 30+ front-office and risk stakeholders.
- Mentored junior engineers, authored technical documentation, and drove **dbt** best practices and **CI/CD** standards; delivered production hotfixes maintaining data platform SLA compliance.
  enabling informed decision-making for Analysts.
- Implemented **data governance** controls with **data lineage**, auditability, and **PII management **policies for REMIT/EMIR datasets using** Terraform-**managed** GCP **and** AWS** infrastructure.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **ETL/ELT** data ingestion using Azure ADF, **Fivetran**, and **PySpark**, building **observability** and **data quality** frameworks that eliminated legacy third-party tooling and reduced costs by 80%.
- Reported to CTO, designing a fintech **data warehouse** platform with **PII management**, data masking, and access control policies providing trusted, secure analytics for 1M+ daily user decisions.
- Designed **Apache Airflow**-style orchestration pipelines with **CI/CD**, **automated testing**, and **data governance** controls, delivering scalable **ELT** workflows with access control and **observability**.
- Mentored junior engineers and led **Data Vault 2.0** data modelling with rules engines enforcing **data quality**, **data lineage**, and governance standards, reducing data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** data warehouse migrations with **automated testing**, workload isolation, and **Terraform**-managed infrastructure ensuring **data quality** and SLA compliance for FTSE-scale clients.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using physical modelling best practices, producing scalable **ETL/ELT** pipelines integrated into core analytics **data warehouses**.
- Authored **SQL** and **Python** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** and **DevOps** delivery standards.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
