AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure Function, Agile/Scrum, Automated Testing, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Denormalisation, Aggregation, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and developed **DBT SQL** data models with **semantic layers**, integrating 100+ source systems into a centralised **Snowflake** warehouse and delivering clean, tested, denormalised datasets for 200+ analysts.
- Engineered **Looker** dashboards via the **Looker API** over **Snowflake** data marts, driving self-service BI adoption for 150+ non-technical business users and reducing ad-hoc **SQL** query load by 60%.
- Led **ELT** pipeline migration to dbt Fusion with **Apache Airflow DAG** orchestration, establishing **Snowflake** target schemas and **CI/CD** pipelines with **automated testing**, cutting deployment errors by 40%.
- Automated **ELT** workflows and **SQL** transformation scripts processing 5-8 TB daily, delivering aggregated, well-documented output datasets consumed by data scientists via **Snowflake** data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and DBT with **CDC** ingestion and **Apache Airflow DAG** orchestration, delivering clean, tested datasets for trading desks across 250+ TB of market data.
- Developed **SQL** reconciliation and **ELT** transformation pipelines for pre-trade market data (prices, positions, exposures, curves), supporting P&L reporting, mark-to-market, and VaR analysis.
- Built rules-engine-driven data quality checks and **Looker** dashboards surfacing denormalised, aggregated **Snowflake** datasets for 30+ front-office stakeholders, driving transparency into P&L and trade settlements.
- Provided L3 support and authored technical documentation for all **SQL** schema changes in the **data warehouse**; developed hotfixes and mentored junior developers on **data modelling** best practices.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **data models** using **Terraform**-managed **Snowflake** infrastructure, ensuring full lineage, auditability, and compliance across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based data ingestion and **SQL data modelling** for the AMETA region using **Azure** ADF, **Databricks**, **PySpark**, eliminating third-party BI tooling and reducing dashboarding costs by 80%.
- Reported to CTO as engineering lead, translating complex **data warehouse** requirements into clean, well-documented **Looker**-ready dashboards for fintech transactions serving 1M+ daily user decisions.
- Designed **ELT** pipelines via **Azure Data Factory** with **Apache Airflow DAG** dependency management, delivering tested, denormalised datasets for downstream data scientists and business consumers.
- Mentored junior developers and led **Data Vault 2.0 data modelling** implementation, structuring clean, aggregated, well-documented **SQL** datasets with rules engines, reducing data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **Snowflake** multi-cluster warehouses for BAT via **Azure Synapse** migration with workload isolation, producing SLA-compliant, well-documented **data models**.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet), applying **physical modelling** best practices to structure denormalised datasets for IoT and supply-chain analytics.
- Migrated AMD Malaysia **data warehouse** from Informatica to Wherescape; authored **SQL** transformations from Oracle to SQL Server and built incremental **ELT** pipeline loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
