AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform (IaC)
-**Data Engineering Tools**: DBT, MLOps, Model Deployment Pipelines, Model Registry, Experiment Tracking, Model Versioning, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), Agentic AI Tools
-**CI/CD**: Git, CI/CD pipelines, Infrastructure as Code, Automated Testing, Azure DevOps, Agile/Scrum, SLA Management, L3 Support
-**Data techniques**: ETL, ELT, Feature Engineering, Near-Real-Time Inference, Feature Drift Monitoring, Prediction Distribution Monitoring, Model Rollback, Model Governance, Model Lineage, Retraining Triggers, Data Modelling, Physical Modelling, Observability, Data Quality, Data Ingestion, Data Warehousing, CDC, Semantic Layers, Rules Engines, Self-Service Analytics

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and deployed production **Gen AI** and **ML** data platforms on **AWS** and **Snowflake**, establishing end-to-end **MLOps** capabilities including **model deployment pipelines**, **model registry, and** experiment tracking**.
- Led **dbt** and **ELT** platform migration establishing version-controlled **Snowflake** schemas, **CI/CD** pipelines with **automated testing**, and environment release promotion paths reducing deployment errors by 40%.
- Automated **near-real-time inference** and **ELT** pipelines using **Fivetran**, **Python**, and **Terraform**-provisioned **AWS**, with **feature drift monitoring** and **observability** ensuring production model and pipeline reliability.
- Implemented **model versioning**, **rollback** procedures, and **model governance** controls including lineage, reproducibility, and auditability standards for production **Gen AI** workloads over **Snowflake** data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** data platform on **Snowflake** and **AWS** with **CDC**-based ingestion and **Airflow** orchestration, delivering reliable, production-grade data foundations supporting 250+ TB of trading analytics.
- Developed **near-real-time inference** data pipelines for pre-trade and market data (prices, positions, curves), supporting SLA-compliant P&L reporting, mark-to-market, and VaR analysis for front-office teams.
- Built rules-engine-driven **data quality** frameworks with **feature drift monitoring** and **observability** dashboards, ensuring production reliability and alerting for 30+ front-office and risk stakeholders.
- Led and mentored a team of data engineers, defining engineering standards, authoring technical documentation, and establishing **model rollback** and incident management processes to maintain production stability.
enabling informed decision-making for Analysts.
- Introduced **model governance** controls for regulatory pipelines (REMIT, EMIR) with full lineage, **model versioning**, auditability, and compliance using **Terraform**-managed **AWS** infrastructure.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **feature engineering** and ingestion pipelines using **Fivetran**, Azure ADF, and **PySpark**, building **observability** frameworks that eliminated third-party tooling and reduced costs by 80%.
- Reported to CTO, defining the operating model between data engineering and product teams, partnering cross-functionally to deliver trusted AI-ready data products supporting 1M+ daily business decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines with **CI/CD**, **automated testing**, and **Infrastructure as Code** via Azure Functions, delivering reliable data platform operations with full **SLA** compliance.
- Mentored junior engineers and led **Data Vault 2.0** data modelling with rules engines enforcing **data governance** and quality standards, reducing data redundancy by 45% and accelerating SDLC delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered production data engineering across multiple client stacks, implementing **Snowflake** migrations with **automated testing**, workload isolation, and **SLA** management for FTSE-scale enterprise clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using scalable architecture best practices, producing analytics-ready **ELT** datasets with full data lineage and auditability.
- Authored **Python** and SQL transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** delivery and **Git** version control.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
