# AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

## Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse, DevOps), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, GitHub Actions, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Dimensional Modelling, Physical Modelling, Incremental Refresh, Schema Evolution, Clustering, Data Contracts, Data Lineage, SLA Management, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, GDPR

## Experience

**Senior Data Engineer** **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed production-grade **dbt** dimensional data models and **Snowflake** schemas, integrating 100+ source systems into curated data marts processing 120+ TB with full automated testing and documentation.
- Led **dbt** platform migration establishing **Snowflake** schemas with incremental refresh, schema evolution management, and **CI/CD** via **Azure DevOps** with **automated testing** suites reducing deployment errors by 40%.
- Engineered orchestrated **ELT** pipelines using **Python** and **Apache Airflow** processing 5-8 TB daily on **AWS/Azure** with data validation tests and SLA-aligned delivery for downstream analytics consumers.
- Designed **Snowflake** curated data marts with **semantic layer** abstractions and **Looker API** integrations, implementing data contracts and lineage frameworks supporting self-service analytics for 150+ business users.

**Lead Data Engineer** **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion, applying clustering, workload separation, and pruning strategies to process 250+ TB across trading and risk functions.
- Developed advanced **SQL** and **Python** reconciliation pipelines with dimensional data models for financial market data (prices, positions, exposures, curves), supporting P&L reporting and regulatory VaR analysis.
- Built rules-engine-driven data quality controls and **Power BI** dashboards with full data lineage tracking, ensuring SLA-compliant, trusted data delivery for 30+ finance and front-office stakeholders.
- Provided **L3** support and authored comprehensive pipeline documentation and data flow architecture diagrams; developed **Python** hotfixes and mentored junior engineers on **Snowflake** and **dbt** best practices.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **Snowflake** data models via **Azure DevOps** CI/CD, enforcing data lineage, auditability, and compliance for client-facing regulatory reporting.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

**Lead Data Engineer** **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **ELT** ingestion pipeline design with **CDC**-based source-to-target data flows for the AMETA region using **Azure** ADF, **Databricks**, and **PySpark**, eliminating third-party tooling and reducing costs by 80%.
- Reported to CTO as engineering lead, delivering reconciliation and financial transaction dashboards with curated, trusted datasets for business stakeholders supporting 1M+ daily operational decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines via **Azure Data Factory **with** CI/CD**, data validation tests, and SLA-aligned orchestration frameworks delivering trusted data to the analytics warehouse.
- Mentored junior engineers and produced comprehensive data model documentation; led **Data Vault 2.0** dimensional modelling with rules engines for data quality enforcement, reducing data redundancy by 45%.

**Data Engineer** **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, implementing workload separation and schema evolution management to ensure full SLA compliance.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** and incremental refresh best practices, integrating IoT/supply-chain feeds via **ELT** pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape; authored complex **SQL** transformations and built incremental **ELT** pipelines with **dimensional modelling**, loading 1B records with 80% efficiency gain.

## Education

**Bachelor of Computer Applications** **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
