AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Databricks, Data Factory, Synapse, DevOps, Key Vault), GCP, Terraform
-**Data Engineering Tools**: DBT Core/Cloud, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (Astronomer/DAGs)
-**CI/CD**: Git, GitHub Actions, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Query Optimisation, Clustering, Caching, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage, Observability, Data Mesh, GDPR

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Architected and optimised **Snowflake** data platform with **dbt Core** semantic layer models, applying query tuning, clustering, and caching strategies across 120+ TB and 100+ source systems for sub-second BI response.
- Led **dbt Core** to dbt Fusion migration, establishing **Snowflake** target schemas and **ELT** pipelines with **CI/CD** via **Azure DevOps** and **automated testing** suites, cutting deployment errors by 40%.
- Automated **ELT** workflows using **Apache Airflow** DAG orchestration and **Python**, processing 5-8 TB daily from telemetry systems on **AWS** with observability monitoring and data reliability engineering checks.
- Designed data governance and lineage frameworks for **Snowflake** data marts underpinning Gen AI-powered analytics and **Looker API** self-service BI, delivering full data traceability for 150+ business users.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and **Databricks** with **CDC**-based ingestion and **Apache Airflow** DAG orchestration, supporting trading desks and risk functions processing 250+ TB.
- Developed advanced **SQL** reconciliation and **ELT** transformation pipelines with query optimisation and caching strategies for pre-trade market data, supporting P&L reporting and VaR analysis.
- Built rules-engine-driven data quality frameworks with **CI/CD**-integrated observability practices and full data lineage tracking, ensuring governance and compliance for 30+ front-office and risk stakeholders.
- Provided **L3** production support, led root cause analysis for **Snowflake** data warehouse incidents, developed **Python** hotfixes, and mentored junior engineers on **dbt** and pipeline best practices.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into **Terraform**-managed **Snowflake** models via **Azure DevOps** CI/CD, enforcing data lineage, access control, and compliance across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **Databricks** and **PySpark**-driven **CDC** pipeline design for AMETA using **Azure** ADF and **Apache Airflow** orchestration, eliminating third-party tooling and reducing infrastructure costs by 80%.
- Reported to CTO as engineering lead, collaborating with architects and business stakeholders to deliver a reconciliation and financial transparency dashboard supporting 1M+ daily user decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines via **Azure Data Factory and Azure DevOps** CI/CD with data reliability engineering practices, delivering fault-tolerant, schema-evolved warehouse solutions.
- Mentored junior engineers through knowledge-sharing initiatives and **dbt** code reviews; led **Data Vault 2.0** implementation with rules engines for data quality, reducing redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, implementing workload isolation and storage optimisation strategies to ensure 99.9% SLA compliance.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** and query tuning best practices, integrating IoT/supply-chain feeds via **ELT** pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape using **Agile/Scrum**; authored advanced **SQL** transformations and built incremental **ELT** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
