LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Change Management, L3 Support
-**Data techniques**: ETL, ELT, Medallion Architecture, Dimensional Modelling, KPI Definitions, Metrics Frameworks, Physical Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage, Data Privacy, GDPR

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed a medallion-style **Snowflake** architecture with **dbt** transformation models, cleanly separating raw ingestion, transformation, and analytics-ready consumption layers across 100+ source systems processing 120+ TB.
- Established a governed **semantic layer** in **Snowflake** to power thin **Power BI** semantic models, defining reusable KPI logic and metrics definitions, reducing downstream modelling complexity for 150+ self-service users.
- Led **dbt** platform migration establishing **Snowflake** target schemas, **ELT** pipelines with version control, automated testing, and change management practices, improving data traceability and maintainability by 40%.
- Designed AI-ready **Snowflake** data foundations with **semantic layer** abstractions and **Looker API** integrations, enabling Gen AI-powered analytics with full data governance, privacy controls, and lineage traceability.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected **ELT** pipelines in **Snowflake** and **dbt** with a layered data architecture, delivering analytics-ready datasets with **dimensional modelling** and defined metrics for trading and risk stakeholders.
- Developed advanced **SQL** reconciliation and **ELT** transformation models defining consistent KPI logic and metrics for pre-trade market data (prices, positions, exposures), supporting P&L reporting and VaR analysis.
- Built governed **Power BI** semantic models backed by reusable **Snowflake dbt** data products, enabling self-service reporting for 30+ front-office stakeholders and reducing single points of BI dependency.
- Authored comprehensive data model documentation and change management practices for all **Snowflake** schema changes; mentored junior engineers on **dbt** patterns and enabled wider self-service data capability.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **Snowflake** data models with full lineage, auditability, and data privacy controls, ensuring responsible data handling across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **ELT** pipeline design and medallion-style ingestion-to-analytics data architecture for the AMETA region using **Azure** ADF, **Databricks**, **PySpark**, reducing external tooling costs by 80%.
- Reported to CTO as engineering lead, defining KPI logic and metrics frameworks for the fintech transaction platform, enabling consistent self-service reporting and reconciliation across 1M+ daily decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines with version control, **automated testing**, and change management frameworks, ensuring governance, traceability, and long-term maintainability of all data models.
- Mentored junior engineers and led knowledge-transfer initiatives through shared documentation and repeatable **dbt** patterns; implemented **Data Vault 2.0** dimensional modelling with rules engines, reducing redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered governed, analytics-ready **Snowflake** warehouse schemas for BAT via **Azure Synapse** migration, with **automated testing** suites and **CI/CD** pipelines ensuring data quality and SLA compliance.
- Designed reusable **Snowflake dimensional** data models on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** best practices, integrating IoT/supply-chain feeds via **ELT** pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape; authored **SQL** transformations with defined metrics definitions and built incremental **ELT** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
