AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Databricks, Data Factory, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, TDD, Automated Testing, Observability, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Idempotent Pipelines, Data Lineage, Auditability, Data Quality, Monitoring, Alerting, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, GDPR

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and evolved a **Snowflake** data warehouse and **Databricks** platform integrating 100+ source systems, processing 120+ TB with full auditability, lineage-awareness, and idempotent pipeline guarantees.
- Led legacy platform migration to **dbt** and **Snowflake**, establishing idempotent **ELT** pipelines, **CI/CD** with **automated testing**, and observability frameworks ensuring production pipeline reliability.
- Engineered auditable **PySpark** and **Python** pipelines on **AWS** processing 5-8 TB daily, implementing data quality validation, monitoring, and alerting frameworks with drift detection and lineage tracking.
- Designed **Snowflake** data marts with **semantic layer** abstractions and **Looker API** integrations, enabling non-technical stakeholders to self-serve Gen AI-powered analytics for 150+ business users.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected auditable **ELT** pipelines in **Databricks** and **Snowflake** with **Kafka**-driven **CDC** ingestion and idempotent processing, supporting regulated trading functions across 250+ TB of market data.
- Developed **Python** and **SQL** reconciliation pipelines translating complex regulatory requirements (REMIT, EMIR) into lineage-aware, auditable data models supporting P&L reporting and VaR analysis.
- Built rules-engine-driven data quality controls with validation, monitoring, and alerting across **Snowflake** workloads, delivering precision and full traceability for 30+ front-office and risk stakeholders.
- Provided **L3** production support and developed **Python** hotfixes for regulated data warehouse incidents; mentored junior engineers on **PySpark** and clean code practices, elevating team delivery standards.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into **Terraform**-managed **Snowflake** models, ensuring full lineage, auditability, and compliance across client-facing regulatory reporting for financial institutions.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **Databricks** and **PySpark**-driven **CDC** pipeline design for AMETA fintech data with **Kafka** streaming via **Azure** ADF, eliminating third-party tooling and reducing infrastructure costs by 80%.
- Reported to CTO as engineering lead, translating complex fintech regulatory requirements into auditable, lineage-aware reconciliation dashboards supporting 1M+ daily financial user transactions.
- Designed **Agile/Scrum**-driven idempotent **ELT** pipelines via **Azure Data Factory** with **CI/CD** and data quality validation controls, ensuring reliable and auditable data delivery to the warehouse.
- Mentored junior engineers on **Python** clean code and **PySpark** best practices; led **Data Vault 2.0** platform modernization with rules engines enforcing data quality controls, reducing redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Modernised BAT's legacy data infrastructure via **Azure Synapse** and **Snowflake** migration, delivering **automated testing** suites and **CI/CD** pipelines with workload isolation ensuring SLA compliance.
- Designed lineage-aware **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** best practices, integrating IoT/supply-chain feeds via **ELT** pipelines.
- Migrated AMD Malaysia legacy data warehouse from Informatica to Wherescape using **Agile/Scrum**; authored complex **SQL** transformations and built incremental **ELT** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
