AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT (Core/Cloud), dbt Custom Macros, dbt Packages, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), MLOps, Model Registry, Experiment Tracking
-**CI/CD**: Git, CI/CD pipelines, Automated Testing, Code Reviews, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Data Quality Testing, Data Assertions, Data Integrity, Documentation Standards, BI Analytics, Experimentation Platforms, Physical Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, CDC, Reconciliation, Semantic Layers, Observability, Self-Service Analytics, Rules Engines, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and built complex **dbt** data models with **custom macros** and **reusable packages**, integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB with comprehensive **data quality** testing strategies.
- Led **dbt** platform migration independently owning **Snowflake** schema design, **ELT** pipelines, and **CI/CD** workflows, establishing robust documentation standards and **data integrity** testing best practices across the team.
- Owned and monitored **dbt** workflow jobs using **Fivetran** and **Python** on **AWS**, with **observability** frameworks, assertions, and alerting ensuring data accuracy, freshness, and pipeline reliability.
- Designed **Gen AI** analytics products and **Looker** dashboards using **Looker API** and **semantic layer** abstractions, delivering **BI analytics** and company-level self-service reporting to 150+ business stakeholders.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **dbt ELT** data models in **Snowflake** and **AWS** with **CDC**-based ingestion and **Airflow** orchestration, delivering trusted data foundations for **BI analytics** and company-level reporting.
- Developed complex **SQL** transformations and reconciliation models for pre-trade and market data, ensuring **data accuracy** and producing analytics-ready datasets for P&L, mark-to-market, and VaR reporting.
- Built rules-engine-driven **data quality** frameworks with assertions and automated validations, ensuring **data integrity** and consistency across **dbt** models for 30+ front-office and risk stakeholders.
- Authored comprehensive documentation for all data warehouse changes; mentored junior engineers on **dbt** modelling and **SQL** best practices, advocating for logging and documentation standards across the team.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with full documentation, lineage, and compliance controls ensuring **data accuracy** for all downstream **BI** and reporting consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **ELT** data ingestion using Azure ADF, **Databricks**, and **Fivetran**, building **observability** and **data quality** testing frameworks that eliminated third-party tooling and reduced costs by 80%.
- Reported to CTO, translating complex business objectives into scalable **dbt**-style **data models**, **delivering a fintech** BI analytics** and self-service reporting platform trusted for 1M+ daily business decisions.
- Designed repeatable, scalable **ELT** workflow pipelines with **CI/CD**, **automated testing**, and documentation standards, ensuring **data accuracy** and accessibility for cross-functional product and business teams.
- Mentored junior developers and led **Data Vault 2.0** data modelling with rules engines enforcing **data quality** and documentation standards, reducing data redundancy by 45% and accelerating SDLC delivery.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** migrations with **automated testing**, workload isolation, and documented **SQL** transformations ensuring **data integrity** and SLA compliance for FTSE-scale enterprise clients.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using physical modelling best practices, producing repeatable, scalable **ELT** pipelines with thorough documentation for downstream consumers.
- Authored **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** with thorough documentation and testing standards.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
