AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift, Lambda), Snowflake, GCP (BigQuery), Azure (Databricks, Data Factory, Synapse), Terraform
-**Data Engineering Tools**: DBT, Apache Spark, PySpark, Fivetran, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, GitHub Actions, CI/CD pipelines, Agile/Scrum, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Dimensional Design, Schema Normalization, Physical Modelling, Data Contracts, Data Lineage, Observability, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, GDPR

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Architected cloud-native **Snowflake** data platform using **dbt** and **ELT** pipelines, integrating 100+ source systems with modular schema designs and data contracts processing 120+ TB of structured data.
- Led **dbt** platform migration establishing **Apache Airflow** DAG orchestration, **CI/CD** pipelines via **GitHub** Actions, and **automated testing** suites enforcing code quality and schema validation rules.
- Engineered fault-tolerant **ELT** pipelines processing 5-8 TB daily using **Python**, **Apache Spark**, and **Terraform**-provisioned **AWS** infrastructure, with data observability monitoring and lineage tracking.
- Designed AI-ready data foundations supporting **RAG** workflows and **Looker API** semantic layer abstractions, enabling Gen AI-powered natural language querying for 150+ business users with low-latency data access.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines using **Databricks**, **dbt**, and **Apache Airflow** DAG orchestration with **CDC**-based ingestion on **AWS**/**Snowflake**, supporting trading desks processing 250+ TB of market data.
- Developed **Python** and **SQL** reconciliation pipelines with clearly defined data contracts and schema validation rules for pre-trade market data, supporting P&L reporting and VaR analysis.
- Built automated data quality checks and rules-engine-driven observability frameworks with full data lineage tracking, delivering governance transparency for 30+ front-office and risk stakeholders.
- Owned production incident resolution, developed **Python** hotfixes, conducted **GitHub** code reviews, and mentored junior engineers on **dbt** and **SQL** best practices, raising team delivery standards.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into **Terraform**-managed **Snowflake** data models, enforcing access control, data lineage, **GDPR** compliance, and auditability across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led cloud-native **ELT** platform design and **CDC**-based data ingestion for the AMETA region using **Azure** ADF, **Databricks**, **PySpark**, eliminating third-party tooling and reducing external costs by 80%.
- Reported to CTO as engineering lead, partnering with product and data science teams to translate analytical requirements into production-grade data products serving 1M+ fintech transactions daily.
- Designed modular **ELT** pipelines via **Azure Data Factory** and **Apache Airflow DAG** orchestration with schema validation and **automated testing**, ensuring fault-tolerant pipeline delivery across sprints.
- Mentored junior engineers via code pairing and **GitHub** pull request reviews; led **Data Vault 2.0** dimensional design implementation with rules engines, reducing data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, contributing directly to the production codebase with workload isolation ensuring SLA compliance.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** and dimensional design best practices, integrating IoT/supply-chain feeds via **ELT** pipelines.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape using **Agile/Scrum**; wrote modular **Python** and **SQL** transformations building incremental **ELT** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
