AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++, Pandas, SQLAlchemy
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Data Quality Frameworks, Data Governance, Observability, Analytics-Ready Datasets, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Self-Service Analytics

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed analytics-ready **dbt** models and **ELT** pipelines integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB, translating complex business requirements into clean, trusted datasets.
- Led end-to-end **ELT** platform migration establishing **Snowflake** schemas, **CI/CD** pipelines with **automated testing**, and **data quality** frameworks reducing production deployment errors by 40%.
- Automated **ELT** ingestion workflows using **Fivetran**, **Python**, and **SQL** processing 5-8 TB daily on **AWS** infrastructure, with **observability** frameworks ensuring pipeline reliability across varied data sources.
- Delivered a **self-service analytics** platform using Looker API and **semantic layer** abstractions, enabling 150+ non-technical stakeholders to independently discover and query trusted **Snowflake** data products.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Apache Airflow** orchestration across multiple trading desks, delivering production-grade analytics-ready datasets over 250+ TB.
- Developed **Python** and **SQL** transformation pipelines for pre-trade and market data, translating complex stakeholder requirements into governed, analytics-ready datasets supporting P&L and VaR analysis.
- Built **data quality** frameworks with rules-engine-driven testing controls and **observability** dashboards, ensuring reliable, trusted data products for 30+ front-office and risk stakeholders.
- Authored technical documentation for all data warehouse changes, developed production hotfixes, and mentored junior engineers on **ELT** design patterns and **data modelling** best practices.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with full lineage, auditability, and compliance controls, ensuring secure and reliable reporting across all downstream analytics consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based data ingestion using **Fivetran** connectors, Azure ADF, and **PySpark**, building **observability** frameworks that eliminated third-party tooling and reduced external app costs by 80%.
- Reported to CTO as Engineering lead, designing a fintech **self-service analytics** platform providing reconciliation and trusted data insights supporting 1M+ daily user decisions across the AMETA region.
- Designed **Agile/Scrum**-driven **ELT** pipelines using Azure Data Factory with **CI/CD**, **automated testing**, and **data quality** controls, delivering reliable analytics across multiple cross-functional teams.
- Mentored junior engineers and led **Data Vault 2.0** physical **data modelling** with rules engines enforcing quality standards, reducing data redundancy by 45% and accelerating SDLC delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client data engineering across varied stacks, implementing **Snowflake** migrations with **automated testing**, workload isolation, and **SQL** transformations ensuring production SLA compliance for FTSE-scale clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** best practices, producing analytics-ready **ELT** datasets for IoT and supply-chain consumers.
- Authored **SQL** and **Python** transformations and built incremental **ELT** pipelines for AMD Malaysia data warehouse migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** delivery across a varied client stack.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
