AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Continuous Improvement, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, API Integrations, Analytics-Ready Datasets, Data Quality, Documentation, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Built end-to-end **dbt** data products in **Snowflake** using **Python** and **SQL**, integrating 100+ source systems into analytics-ready datasets with full documentation, testing standards, and governance.
- Led **dbt** platform migration establishing **Snowflake** schemas, **ELT** pipelines, **Apache Airflow **orchestration, and** CI/CD **patterns with** automated testing**, improving team delivery standards by 40%.
- Engineered **Python**-based **ELT** pipelines on **AWS** processing 5-8 TB daily, leveraging AI-enabled development workflows to accelerate delivery without compromising data quality best practices.
- Designed AI-powered analytics with **Looker API** integrations and **semantic layer** abstractions, translating business needs into production-ready **Snowflake** data products for 150+ self-serve stakeholders.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** data pipelines and production **dbt** models in **Snowflake** using **Python** and **SQL**, delivering analytics-ready financial datasets for trading desks processing 250+ TB.
- Developed **Python** and **SQL** transformation pipelines for portfolio performance monitoring, translating pre-trade market data (positions, exposures, P&L curves) into governed, analytics-ready datasets.
- Built rules-engine-driven data quality checks with full technical documentation and Power BI dashboards, ensuring maintainable, trustworthy data products for 30+ fintech front-office and risk stakeholders.
- Developed API-based source system integrations and **Python** hotfixes for production data incidents; authored technical documentation and mentored junior engineers on **dbt** and **SQL** best practices.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models using **Terraform**, enforcing lineage, auditability, and compliance for fintech regulatory and investor-facing reporting.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led end-to-end **ELT** fintech data product delivery with **CDC**-based ingestion using **Azure** ADF, **Databricks**, **PySpark**, translating business needs into scalable data models and reducing costs by 80%.
- Reported to CTO, translating complex fintech business requirements into production-grade data models for transaction and portfolio monitoring dashboards supporting 1M+ daily financial decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines with **CI/CD** patterns, **Apache Airflow** orchestration, and **automated testing**, continuously improving how the team ships reliable data products.
- Mentored engineers on **dbt** and data quality standards; led **Data Vault 2.0** physical modelling with documented, maintainable rules engines, reducing fintech data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, building production-grade data models with workload isolation ensuring SLA compliance.
- Designed **Snowflake** external tables and **API**-based source integrations on **AWS** S3 for semi-structured data (JSON, Parquet), delivering analytics-ready **ELT** pipelines for IoT/supply-chain feeds.
- Authored **Python** and **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia data warehouse migration, delivering robust production data models loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
