Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, GCP, Azure (Databricks, Data Factory, Synapse), Terraform
-**Data Engineering Tools**: DBT, Apache Spark, PySpark, Apache Beam, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, L3 Support
-**Data techniques**: ETL, ELT, Batch Pipelines, Streaming Pipelines, Data Modelling, Layered Modelling (Staging/Transformation/Reporting), Physical Modelling, Data Quality Monitoring, Alerting, Data Ingestion, Data Migration, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and maintained **dbt** layered data models (staging, transformation, reporting) integrating 100+ source systems into a **Snowflake** warehouse, producing core datasets used for analytics and business ROI reporting.
- Led **dbt** platform migration establishing **Snowflake** schemas, **Apache Airflow** workflow orchestration, and **CI/CD** pipelines with validation tests and alerting to ensure reliable pipeline outputs.
- Owned batch and **streaming** pipelines using **PySpark**, **Python**, and **AWS** infrastructure processing 5-8 TB daily, implementing data quality monitoring and alerting systems for timely, accurate data delivery.
- Developed analytics models and **Looker API** dashboards translating pipeline and service data into reporting for system reliability and business ROI, enabling strategic decisions for 150+ stakeholders.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected batch and **streaming** pipelines using **PySpark**, **Kafka**, and **Apache Airflow** orchestration in **Snowflake**, generating core financial datasets for reporting and ROI analysis across 250+ TB.
- Developed **SQL**-driven **dbt** analytics models and reconciliation pipelines for pre-trade market data (prices, positions, exposures, curves), enabling P&L reporting, mark-to-market, and VaR analysis.
- Built rules-engine-driven data quality controls with validation tests, monitoring, and alerting systems, delivering Power BI dashboards for 30+ stakeholders with reliable, accurate pipeline outputs.
- Owned end-to-end pipeline delivery from business requirements to production deployment; provided **L3** support, developed **Python** hotfixes, and mentored junior engineers on data engineering best practices.
  enabling informed decision-making for Analysts.
- Maintained data export pipelines connecting backend services and **Snowflake** warehouse to downstream consumers; integrated REMIT/EMIR datasets enforcing full lineage, auditability, and compliance.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led batch and **streaming ELT** pipeline design with **CDC**-based ingestion for AMETA using **Azure** ADF, **Databricks**, **PySpark**, generating core datasets for downstream analytics and reducing costs by 80%.
- Reported to CTO, partnering with product managers and insights teams to define metrics, build dashboards, and generate data informing strategic fintech decisions across 1M+ daily user transactions.
- Designed **Apache Airflow** workflow orchestration with **CI/CD** and data validation tests, ensuring reliable, timely data delivery to downstream analytics consumers and eliminating pipeline failures.
- Led **dbt**-style layered **Data Vault 2.0** data modelling with rules engines for quality enforcement; mentored engineers, reducing data redundancy by 45% across core reporting datasets.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered batch **ELT** pipelines and **automated testing** suites for BAT's **Snowflake** multi-cluster migration at scale, implementing workload isolation and monitoring to ensure SLA compliance.
- Designed **Snowflake** external tables and data export pipelines on **AWS** S3 for semi-structured data (JSON, Parquet), applying **physical modelling** best practices to integrate IoT/supply-chain feeds.
- Authored production-quality **Python** and **SQL** warehouse transformations and built incremental batch **ELT** pipelines for AMD Malaysia data warehouse migration, loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
