AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Databricks, Azure (Data Factory, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT (Core/Cloud), Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), MLOps, Model Registry, Experiment Tracking, Model Versioning
-**CI/CD**: Git, CI/CD pipelines, Code Reviews, Automated Testing, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Dimensional Modelling, Fact & Dimension Models, Data Vault 2.0, Third Normal Form, Data Modelling, PII Governance, Data Governance, Data Quality Frameworks, Documentation Standards, Semantic Layers, Observability, Single Source of Truth, Self-Service Analytics, Physical Modelling, CDC, Reconciliation, Rules Engines, Cost Optimisation, Near-Real-Time Inference, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Led the technical vision and architecture of the **dbt** project, integrating 100+ source systems into a centralised **Snowflake** data warehouse processing 120+ TB as a **single source of truth** for all critical business functions.
- Drove end-to-end **dbt Core** to dbt Fusion migration, establishing **Snowflake** target schemas, **dimensional data models**, **CI/CD** pipelines, and code quality standards with comprehensive **automated testing**.
- Engineered **ELT** ingestion pipelines using **Fivetran** and **Python** on **Terraform**-provisioned **AWS**, with **data quality** frameworks and **observability** controls reducing pipeline incidents by 35%.
- Designed customer-facing **agentic** data products using **Gen AI** and **Looker API**, implementing **dbt semantic layers** as trusted, scalable analytics foundations over **Snowflake** fact and dimension models.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected and scaled the **dbt** project in **Snowflake** with **Data Vault 2.0** and **dimensional modelling**, establishing fact and dimension tables as a **single source of truth** for trading, settlements, and risk.
- Developed advanced **SQL** transformations for pre-trade and market data, delivering analytics-ready, governed datasets for **Finance** and risk stakeholders on P&L, mark-to-market, and VaR analysis.
- Instituted **data quality** frameworks with rules-engine-driven testing, **data governance** controls, and **observability** dashboards ensuring data trust and reliability for 30+ commercial stakeholders.
- Mentored junior engineers, authored technical documentation, and drove **dbt** best practices, **CI/CD** code quality standards, and delivery roadmap execution, elevating analytics engineering team maturity.
  enabling informed decision-making for Analysts.
- Implemented **PII governance** and compliance controls for REMIT/EMIR datasets within governed **dbt** models, ensuring full lineage, auditability, and documentation standards for all downstream analytics consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **ELT** pipeline delivery using Azure ADF, **Databricks**, and **Fivetran**, building **observability** and **data quality** frameworks that eliminated third-party tooling and reduced external app costs by 80%.
- Reported to CTO, driving the strategic data infrastructure roadmap and delivering a fintech **self-service analytics** platform as a trusted **single source of truth** for 1M+ daily business decisions.
- Partnered with **Sales**, **Finance**, and Product leadership to translate business objectives into executable engineering requirements, delivering governed **dbt**-style data models with **CI/CD** and testing standards.
- Mentored junior engineers and led **Data Vault 2.0** dimensional **data modelling** with rules engines enforcing **data governance** and **PII governance** standards, reducing data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** migrations with performance tuning, workload isolation, and **automated testing**, ensuring **cost optimisation** and SLA compliance for FTSE-scale enterprise clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using **dimensional modelling **best practices, producing analytics-ready** ELT** fact and dimension datasets for downstream consumers.
- Authored advanced **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** and code quality standards.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
