AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Wherescape, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), Fivetran, MLOps, Model Registry, Experiment Tracking, Model Versioning
-**CI/CD**: Git, CI/CD pipelines, Automated Testing, Code Reviews, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Data Warehousing, Dimensional Modelling, Data Products, Data Warehouse Architecture, Legacy ETL Modernisation, Data Modelling, Physical Modelling, Data Governance, Data Quality, Observability, Data Ingestion, Data Migration, Streaming, CDC, Reconciliation, Semantic Layers, Rules Engines, Self-Service Analytics, Near-Real-Time Inference, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Led **data warehouse** architecture redesign, building scalable **dbt** data models integrating 100+ source systems into **Snowflake** processing 120+ TB, establishing governed foundations for analytics and **AI/ML** initiatives.
- Drove end-to-end **ELT** platform migration from **dbt Core** to dbt Fusion, establishing **Snowflake** schemas, **CI/CD** pipelines, and **automated testing** as core engineering best practices for the data platform.
- Engineered scalable **ETL/ELT** data product pipelines using **Fivetran** and **Python** on **Terraform**-provisioned **AWS**, with **observability** frameworks ensuring data reliability, quality, and freshness.
- Delivered production-ready **data products** and **Gen AI** model pipelines using **MLOps** and **Looker API**, transforming complex data models into reliable, governed datasets powering self-service analytics at scale.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT data warehouse** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Airflow** orchestration, delivering production-ready **data products** across 250+ TB of trading data.
- Designed complex **SQL** analytical models and reconciliation transformations for pre-trade market data, producing governed, scalable **data products** supporting P&L, mark-to-market, and VaR analytics.
- Built **data quality** and **observability** frameworks with rules-engine-driven testing and dashboards, ensuring **data reliability** and governance across key datasets for 30+ front-office and risk stakeholders.
- Contributed to engineering standards and documentation; mentored junior engineers on **dbt** and **ETL/ELT** best practices, and delivered production hotfixes ensuring **data warehouse** SLA compliance.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt dimensional** data models with full lineage, auditability, and **data governance** controls using **Terraform**-managed **AWS** infrastructure.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **ELT** data platform development using Azure ADF, **Databricks**, and **Fivetran**, building **observability** frameworks that eliminated legacy tooling and reduced external app costs by 80%.
- Reported to CTO, architecting a scalable fintech **data warehouse** and self-service analytics platform, transforming complex **data models** into trusted **data products** supporting 1M+ daily business decisions.
- Designed **Agile/Scrum**-driven **ETL/ELT** pipelines with **CI/CD**, **automated testing**, and **observability** controls, improving **data reliability** and governance across the data warehouse platform.
- Mentored junior engineers and led **Data Vault 2.0 dimensional modelling** with rules engines enforcing **data quality** and governance standards, reducing data redundancy by 45% and accelerating delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered large-scale **data warehouse** migrations using **Wherescape** and **Snowflake**, modernising legacy **ETL** ecosystems with **automated testing** and workload isolation for FTSE-scale enterprise clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using **dimensional modelling **best practices, producing scalable** ETL/ELT** data products for IoT and supply-chain analytics consumers.
- Migrated legacy ETL from Informatica to **Wherescape** for AMD Malaysia, authoring **SQL** and **Python** transformations and building incremental **ELT** pipelines loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
