AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Apache Airflow (DAGs), Lightdash
-**CI/CD**: Git, CI/CD pipelines, Azure DevOps, Agile/Scrum, Automated Testing, Code Reviews, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Analytics-Ready Datasets, Data Governance, Observability, Data Quality, Incremental Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Self-Service Analytics

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Owned and developed analytics-ready **dbt** models transforming raw data into clean, documented, trusted sources of truth in **Snowflake**, integrating 100+ source systems across 120+ TB with full version control.
- Led end-to-end **dbt** platform migration establishing **ELT** schemas, **CI/CD** pipelines with **automated testing**, and observable, version-controlled analytics environments reducing deployment errors by 40%.
- Automated **ELT** ingestion workflows using **Fivetran** connectors and **Python** processing 5-8 TB daily on **AWS** infrastructure, with **observability** frameworks ensuring pipeline reliability and data quality.
- Designed a **self-service analytics platform** using Looker API and **semantic layer** abstractions over **Snowflake**, enabling 150+ stakeholders to independently discover, query, and build on trusted data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Apache Airflow** orchestration, delivering trusted analytics-ready datasets across 250+ TB of fintech trading data.
- Developed **Python** and **SQL** reconciliation models for pre-trade market data, translating complex fintech business requirements into governed, analytics-ready datasets supporting P&L and VaR analysis.
- Built rules-engine-driven **data governance** controls and **observability** dashboards with Power BI, ensuring reliable, trusted data products for 30+ front-office and risk stakeholders.
- Authored comprehensive **dbt** model documentation, conducted code reviews, and mentored junior engineers; championed **CI/CD** and version control standards raising team analytics engineering maturity.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with lineage, auditability, and compliance controls ensuring secure, reliable fintech reporting across all downstream consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based data ingestion using **Fivetran** connectors, Azure ADF, and **PySpark**, building **observability** frameworks that eliminated third-party tools and reduced external app costs by 80%.
- Reported to CTO as Engineering lead, designing a fintech **self-service analytics platform** providing reconciliation and trusted data products supporting 1M+ daily user decisions across the AMETA region.
- Designed **Agile/Scrum**-driven **ELT** pipelines with **CI/CD**, **automated testing**, and **observability** controls, enabling self-service data access and reliable delivery to 50+ downstream business stakeholders.
- Mentored junior engineers and led **Data Vault 2.0** physical modelling with rules engines enforcing **data governance** and quality standards, reducing data redundancy by 45% and accelerating delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, building governed, version-controlled data models with workload isolation ensuring SLA compliance.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using physical modelling best practices, producing analytics-ready **ELT** datasets for IoT and supply-chain consumers.
- Authored **Python** and **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia data warehouse migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** delivery.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
