Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT
-**CI/CD**: Git, CI/CD pipelines, Azure Function, Agile/Scrum, Automated Testing, L3 Support, SDLC
-**Data techniques**: ETL, ELT, Data Modelling, Physical Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and maintained **Snowflake data warehouse** with **semantic layer** abstractions and **physical modelling**, integrating 100+ source systems processing 120+ TB of structured and semi-structured data.
- Owned end-to-end **SDLC** migration from dbt Core to dbt Fusion, establishing **ELT** target schemas and **CI/CD** pipelines with **automated testing** suites, cutting deployment errors by 40%.
- Automated **ELT** workflows processing 5-8 TB daily from telemetry and operational systems using **Python**, **SQL**, and **Terraform**-provisioned **AWS** infrastructure, reducing ingestion latency by 35%.
- Engineered Gen AI-powered analytics with **semantic layer** query interfaces over **Snowflake** data marts, enabling self-service BI for 50+ non-technical stakeholders and reducing ad-hoc query load by 60%.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake**, DBT, and **AWS**/**Azure** with **CDC**-based ingestion, delivering sub-hour data freshness for Natural Gas and Power trading desks across 250+ TB.
- Developed **reconciliation** and **ETL** transformation pipelines for pre-trade market data (prices, positions, exposures, curves), supporting P&L reporting, mark-to-market, and VaR analysis.
- Built **rules-engine**-driven data quality frameworks and Power BI dashboards, translating complex **data warehouse** outputs into business-friendly reporting for 30+ front-office and risk stakeholders.
- Provided **L3 support**, developed hotfixes for production **Snowflake** incidents maintaining 99.9% uptime SLA, authored technical documentation, and **mentored junior developers** on best practices.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **physical models** using **Terraform**-managed infrastructure, ensuring full lineage, auditability, and compliance across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based data ingestion and **physical modelling** design for the AMETA region using **Azure** ADF, **Databricks**, **PySpark**, eliminating third-party tools and reducing external costs by 80%.
- Reported to CTO as engineering lead, translating complex **data warehouse** requirements into business-friendly **reconciliation** dashboards for fintech transactions supporting 1M+ daily user decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines via **Azure Data Factory** and Azure Functions orchestration, acting as **L3 support** escalation point and resolving 95% of incidents within SLA.
- **Mentored junior developers** and architected a **Data Vault 2.0 data warehouse** using **physical modelling** with **rules engines**, reducing redundancy by 45% and accelerating **SDLC** delivery by 30%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **Snowflake** multi-cluster warehouses for BAT via **Azure Synapse** migration, enforcing workload isolation, SLA compliance, and full **L3 support** coverage.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **physical modelling** best practices, integrating IoT/supply-chain feeds via **ELT** into analytics pipelines.
- Migrated AMD Malaysia **data warehouse** from Informatica to Wherescape using **Agile/Scrum**; built incremental **ELT** pipeline with **SQL** transformations loading 1B records, achieving 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
