LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Apache Airflow (DAGs), Kafka, Fivetran, PySpark, CDC, ELT, Looker, Looker API, MLOps, Model Registry, Experiment Tracking, Model Versioning, Grafana
-**CI/CD**: Git, CI/CD pipelines, Automated Testing, Azure DevOps, Agile/Scrum, L3 Support, Operational Playbooks
-**Data techniques**: ETL, ELT, Event-Driven Architecture, Near-Real-Time Processing, Financial Reconciliation, Settlement Tracking, Ledger-Style Data Modelling, Merchant Reporting, Transaction Health Monitoring, Data Quality, Observability, Data Modelling, Physical Modelling, Data Ingestion, Streaming, Data Warehousing, CDC, Semantic Layers, Rules Engines, Self-Service Analytics, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and operated **event-driven ELT** data pipelines using **Python** and **dbt**, integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB with end-to-end production ownership.
- Led **dbt** platform migration establishing **Snowflake** schemas, **CI/CD** pipelines with **automated testing**, and production **observability** monitoring for data correctness, freshness, and reliability.
- Engineered **near-real-time** data ingestion pipelines using **Kafka**, **Fivetran**, and **Python** on **Terraform**-provisioned **AWS**, with monitoring and alerting ensuring pipeline reliability and data quality.
- Built **Gen AI** data products and backend data services using **Looker API** and **MLOps** pipelines, exposing trusted **Snowflake** data to downstream teams via governed APIs and **semantic layer** abstractions.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **event-driven ELT** pipelines in **Snowflake** and **dbt** with **Kafka**-based **CDC** ingestion and **Apache Airflow** orchestration, processing high-volume transactional trading and settlement data.
- Developed **near-real-time financial reconciliation** and **ledger-style** transformation pipelines for pre-trade market data (prices, positions, exposures), supporting P&L reporting, mark-to-market, and **settlement tracking**.
- Built **data quality** frameworks and **observability** monitoring dashboards, ensuring **transaction health**, pipeline freshness, and data correctness for 30+ front-office and risk stakeholders.
- Owned and operated production data systems end-to-end, authoring operational playbooks, developing hotfixes for production incidents, and mentoring junior engineers on **Python** and **SQL** engineering best practices.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with full lineage, auditability, and **data quality** controls ensuring compliance across all downstream financial reporting consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based **event-driven** data ingestion for the AMETA fintech region using Azure ADF, **PySpark**, and **Fivetran**, with **observability** frameworks ensuring **transaction health** and pipeline reliability.
- Reported to CTO, designing a fintech **financial reconciliation** platform processing 1M+ daily transactions, providing **merchant reporting** and rich visual summaries of payment decisions and user activity.
- Designed **near-real-time ELT** pipelines with **Apache Airflow** orchestration, **CI/CD**, **automated testing**, and production monitoring, delivering reliable data systems with full SLA compliance.
- Mentored junior engineers and led **Data Vault 2.0** transactional **data modelling** with rules engines enforcing **data quality** standards, reducing data redundancy by 45% and accelerating delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered production **Snowflake** migrations with **automated testing**, workload isolation, and high-volume transactional data handling, ensuring SLA compliance and operational reliability for FTSE-scale enterprise clients.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **ledger-style** physical modelling best practices, producing **ELT** datasets for IoT and supply-chain consumers.
- Authored **Python** and **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** and production engineering standards.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
