AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Apache Airflow (DAGs), Looker, Looker API, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, MLOps, Model Registry, Experiment Tracking, Model Versioning
-**CI/CD**: Git, CI/CD pipelines, Automated Testing, Code Reviews, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Analytics Pipelines, Data Quality Frameworks, Semantic Layers, Observability, Self-Service Analytics, Data Democratisation, Physical Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, CDC, Reconciliation, Rules Engines, Near-Real-Time Inference, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Owned and drove adoption of **dbt** as the core analytics engineering platform, designing and maintaining documented, tested **data models** integrating 100+ source systems into a centralised **Snowflake** warehouse across 120+ TB.
- Led end-to-end **dbt** platform migration independently owning **Snowflake** schema design, **ELT** pipeline architecture, and **CI/CD** with **automated testing**, establishing analytics engineering best practices for the team.
- Engineered **Python**-based **ELT** ingestion pipelines using **Fivetran** and **Apache Airflow** DAG orchestration processing 5-8 TB daily, with **observability** frameworks ensuring data quality and reliability.
- Designed and deployed **Gen AI** analytics applications using **Looker API** and **semantic layer** abstractions, enabling 150+ stakeholders with self-service BI access to trusted, analytics-ready **Snowflake** data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** analytics pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Apache Airflow** DAG orchestration, delivering trusted core datasets across 250+ TB of trading data.
- Developed advanced **Python** and **SQL** transformation models for pre-trade market data, translating complex business requirements into analytics-ready datasets supporting P&L and VaR stakeholder reporting.
- Built **data quality** frameworks with observability monitoring and **Looker** dashboards, delivering data storytelling on P&L, working capital, and trade settlements to 30+ front-office and risk stakeholders.
- Mentored junior engineers on **dbt data modelling** and **SQL** best practices; authored technical documentation and drove **CI/CD** standards, elevating analytics engineering maturity across the squad.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models, establishing lineage, auditability, and compliance controls using **Terraform**-managed **AWS** infrastructure for all downstream consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based analytics pipeline delivery using Azure ADF, **PySpark**, and **Fivetran**, building **observability** frameworks that eliminated third-party tooling and reduced external app costs by 80%.
- Reported to CTO, owning the strategic data infrastructure roadmap and delivering a fintech **self-service analytics** platform providing trusted insights across 1M+ daily user decisions for the AMETA region.
- Designed **Agile/Scrum**-driven **ELT** pipelines with **Apache Airflow**-style orchestration, **CI/CD**, and **automated testing**, building core datasets with **observability** controls to power downstream analytics.
- Mentored junior engineers and led **Data Vault 2.0** physical **data modelling** with rules engines, reducing data redundancy by 45% and accelerating SDLC delivery maturity across the analytics engineering team.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** data warehouse migrations with **automated testing**, workload isolation, and advanced **SQL** query optimisation ensuring SLA compliance for FTSE-scale clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using **data modelling **best practices, producing analytics-ready** ELT** core datasets for IoT and supply-chain analytics consumers.
- Authored **SQL** and **Python** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** delivery and version control.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
