AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, BigQuery, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Power BI, Apache Airflow (DAGs)
-**CI/CD**: Git, CI/CD pipelines, Code Reviews, Azure DevOps, Agile/Scrum, Automated Testing, L3 Support
-**Data techniques**: ETL, ELT, Data Modelling, Data Marts, Physical Modelling, Semantic Layers, Metric Definitions, SQL Query Optimisation, Data Quality Testing, Dashboard Design, Data Governance, Observability, Self-Service Analytics, Data Ingestion, Data Migration, Streaming, Data Warehousing, CDC, Reconciliation, Rules Engines

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Designed and maintained well-documented, tested **dbt** data models with **semantic layer** metric definitions integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB.
- Led end-to-end **dbt** platform migration establishing **Snowflake** schemas, **ELT** pipelines, and **CI/CD** with **automated testing** and **code reviews**, ensuring a reliable, version-controlled analytics layer.
- Automated **ELT** ingestion workflows using **Fivetran** and **Python** processing 5-8 TB daily on **AWS**, with **data quality** frameworks and **observability** controls ensuring pipeline accuracy and stability.
- Owned and enhanced an external-facing **self-service analytics** product using **Looker API** and **semantic layer** abstractions, enabling 150+ partners and stakeholders to independently query trusted **Snowflake** data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected scalable **ELT** pipelines in **Snowflake** and **dbt** with **CDC**-based ingestion and **Airflow** orchestration, delivering documented, tested data models supporting trading, settlements, and risk analytics.
- Developed advanced **SQL** transformations using CTEs, window functions, and complex joins for pre-trade market data, translating business requirements into analytics-ready P&L, mark-to-market, and VaR datasets.
- Built rules-engine-driven **data quality** testing frameworks and intuitive **Power BI** dashboards delivering transparent P&L and trade settlement analytics to 30+ front-office and risk stakeholders.
- Authored technical documentation and led **code reviews** for all data warehouse changes; mentored junior engineers on **dbt data modelling** and **SQL** query optimisation across financial services pipelines.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** data models with full lineage and auditability, ensuring compliant financial services reporting across all downstream analytics consumers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based data ingestion using **Fivetran** connectors, Azure ADF, and **PySpark**, building **observability** frameworks ensuring pipeline accuracy and eliminating third-party tooling, reducing costs by 80%.
- Reported to CTO, gathering requirements from Commercial, Operations, and Product teams to design and deliver a fintech **self-service analytics** platform trusted for 1M+ daily business decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines with **CI/CD**, **automated testing**, and intuitive **self-service data marts**, empowering 50+ analysts and business users to perform independent analysis confidently.
- Mentored junior engineers and led **Data Vault 2.0** data modelling implementation with rules engines enforcing **data quality** standards, reducing data redundancy by 45% and accelerating SDLC delivery cycles.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** migrations with **automated testing**, workload isolation, and advanced **SQL query optimisation** ensuring production SLA compliance for FTSE-scale clients including BAT.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data (JSON, Parquet) using **data modelling** best practices, producing analytics-ready **ELT** datasets for IoT and supply-chain consumers.
- Authored advanced **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia data warehouse migration, loading 1B records with 80% efficiency gain using **Agile/Scrum** delivery.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
