AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Redshift), Snowflake, Azure (Data Factory, Databricks, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT (Core/Cloud), Apache Airflow (DAGs, Dag Factory), Looker, Looker API, Fivetran, PySpark, Kafka, Data Vault 2.0, CDC, ELT, MLOps, Model Registry, Experiment Tracking, Model Versioning
-**CI/CD**: Git, CI/CD pipelines, Automated Testing, Code Linting, Code Reviews, RBAC, Azure DevOps, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Analytics-Ready Data Marts, Data Modelling, Semantic Governance, Data Lineage, Data Governance, RBAC, Snowflake Cost Optimisation, Technical Debt Refactoring, Physical Modelling, Data Warehousing, CDC, Reconciliation, Semantic Layers, Observability, Self-Service Analytics, Near-Real-Time Inference, Feature Drift Monitoring, Model Rollback

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Owned **dbt** modelling architecture across multiple domains, designing and evolving scalable **analytics-ready data marts** integrating 100+ source systems into a centralised **Snowflake** warehouse processing 120+ TB.
- Led **dbt** platform migration owning **Snowflake** schema design, **ELT** pipelines, and **CI/CD** with **automated testing**, code linting, and **code review** standards elevating analytics engineering quality.
- Designed **Apache Airflow** DAG orchestration and alerting frameworks for **ELT** workflows using **Fivetran** and **Python**, with **observability** controls ensuring pipeline SLA adherence and incident response.
- Strengthened **semantic governance** across **dbt** and **Looker** using the **Looker API**, enabling trusted **ML** workflow enablement and self-service analytics for 150+ stakeholders over **Snowflake** data marts.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Owned **dbt** domain modelling architecture in **Snowflake**, designing scalable **ELT** pipelines and **analytics-ready data marts** with **Apache Airflow** orchestration supporting 250+ TB of regulated fintech trading data.
- Developed complex **SQL** transformation logic for pre-trade and market data, translating business and risk requirements into governed, analytics-ready datasets supporting P&L, mark-to-market, and VaR reporting.
- Implemented **data governance** and **RBAC** security controls with **data lineage** tracking and audit-ready documentation, ensuring trusted, compliant analytics for 30+ front-office and risk stakeholders.
- Led structured **code reviews**, authored technical documentation, and mentored junior engineers on **dbt** modelling standards, naming conventions, and **CI/CD** best practices, driving engineering culture improvements.
enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** models with **data lineage**, auditability, and **semantic governance** controls using **Terraform**-managed infrastructure ensuring audit-ready compliance.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **CDC**-based fintech **ELT** pipeline delivery using Azure ADF, **Fivetran**, and **PySpark**, building **observability** and SLA adherence frameworks that reduced third-party tooling costs by 80%.
- Reported to CTO, owning fintech **analytics-ready data mart** architecture and delivering a self-service platform trusted across Product, Risk, and Finance for 1M+ daily business decisions.
- Designed orchestration pipelines with **CI/CD**, **automated testing**, code **linting**, and **data governance** controls, delivering reliable **ELT** workflows with structured incident response practices.
- Mentored junior engineers and led **Data Vault 2.0** data modelling refactoring with rules engines, enforcing naming conventions and governance standards, reducing technical debt and data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered multi-client **Snowflake** data warehouse migrations with performance tuning, **cost optimisation**, **workload isolation, and** automated testing** ensuring SLA compliance for FTSE-scale enterprise clients.
- Designed **Snowflake** external tables on **AWS** S3 for semi-structured data using physical modelling best practices and **SQL** query optimisation, producing scalable **ELT** datasets for downstream consumers.
- Authored **SQL** transformations and built incremental **ELT** pipelines for AMD Malaysia migration, loading 1B records with 80% efficiency gain using **Git**-based version control and **Agile/Scrum** delivery.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
