AAMIR ALI

LinkedIn | 7462-158-261 | RM8 3ED , London Uk | aamirali7596@gmail.com | GitHub

Skills

-**Programming Languages**: Python, SQL, C++
-**Databases**: CosmosDB, MSSQL, NoSQL, SnowSQL, kdb+
-**Cloud Platforms**: AWS (S3, EC2, EMR, Glue, Lambda, Step Functions, Redshift), Snowflake, Azure (Databricks, Data Factory, Synapse), GCP, Terraform
-**Data Engineering Tools**: DBT, PySpark, Kafka, Data Vault 2.0, CDC, ELT, Looker, Looker API, Tableau, Apache Airflow (DAGs)
-**CI/CD**: Git, GitHub Actions, CI/CD pipelines, Continuous Integration, Automated Testing, Code Reviews, Agile/Scrum, L3 Support
-**Data techniques**: ETL, ELT, Analytics Engineering, Data Modelling, Physical Modelling, Dimensional Modelling, Data Ingestion, Data Migration, Streaming, Data Warehousing, Data Analysis, CDC, Reconciliation, Semantic Layers, Rules Engines, Data Lineage

Experience

Senior Data Engineer **Build A Rocket Boy** *London, United Kingdom* **05/2025 - Current**

- Owned and developed the **dbt** analytics engineering architecture, integrating 100+ source systems into a centralised **Snowflake** modelling layer with **CI/CD**, **automated testing**, and rigorous code reviews.
- Led **dbt Core** to dbt Fusion migration, establishing **Snowflake** transformation schemas, **Airflow** orchestration, and continuous integration pipelines, reducing pipeline errors and enabling team self-sufficiency.
- Automated **ELT** workflows on **AWS** (**Glue**, **Lambda**) processing 5-8 TB daily with **Python**, proactively identifying optimisation opportunities and improving transformation layer performance by 35%.
- Harnessed AI workflows and **Looker API semantic layer** abstractions to enable Gen AI-powered natural language querying over **Snowflake** data marts, empowering 150+ business users to self-serve reliably.

Lead Data Engineer **Castleton Commodities Int.** *London, United Kingdom* **08/2024 – 04/2025**

- Architected **dbt** transformation pipelines integrated with **Snowflake**, **Apache Airflow** orchestration, and **AWS** with **CDC**-based ingestion, delivering tested, documented datasets for trading desks processing 250+ TB.
- Developed advanced **SQL** and **dbt** transformation models for pre-trade market data (prices, positions, exposures, curves), optimising query performance and delivering consistent, analytics-ready datasets.
- Built **Power BI** dashboards backed by well-defined **dbt** data products, translating complex data into self-serve insights for 30+ non-technical front-office and risk stakeholders.
- Authored comprehensive data model documentation and trained junior engineers on **dbt** and data modelling best practices through code reviews, upskilling the team's analytics engineering capability.
  enabling informed decision-making for Analysts.
- Integrated REMIT/EMIR regulatory datasets into governed **dbt** models with version control, lineage tracking, and **CI/CD** change management, ensuring auditability and compliance across all reporting layers.
-Integrated **regulatory reporting datasets (REMIT, EMIR)** into governed data models, ensuring full lineage, auditability, and compliance.

Lead Data Engineer **Sodexo** *London, United Kingdom* **05/2023 – 01/2024**

- Led **Databricks** and **PySpark**-driven **ELT** analytics pipeline design for the AMETA region, integrating **dbt** transformation patterns with **Azure** ADF orchestration, reducing third-party tooling costs by 80%.
- Reported to CTO as engineering lead, acting as technical liaison between engineers and non-technical stakeholders, translating business needs into **dbt** data models supporting 1M+ daily self-serve decisions.
- Designed **Agile/Scrum**-driven **ELT** pipelines via **Azure Data Factory** with version control, **CI/CD**, and **automated testing**, applying software engineering principles to analytics transformation code.
- Trained and upskilled junior engineers in **dbt** and data modelling best practices through workshops and code reviews; led **Data Vault 2.0** implementation, reducing data redundancy by 45%.

Data Engineer **Wherescape USA** *(United States -Remote)* **07/2019 - 05/2023**

- Delivered **automated testing** suites and **CI/CD** pipelines for BAT's **Snowflake** multi-cluster migration, implementing workload isolation and ensuring SLA-compliant, well-documented data product delivery.
- Designed **Snowflake** external tables on **AWS Glue** and S3 for semi-structured data (JSON, Parquet) using **physical modelling** best practices, building analytics-ready datasets for IoT/supply-chain consumers.
- Migrated AMD Malaysia data warehouse from Informatica to Wherescape; authored optimised **SQL** transformations and built incremental **ELT** pipelines with **automated testing**, loading 1B records with 80% efficiency gain.

Education

Bachelor of Computer Applications **Pune University** *Mumbai, India* **05/2016 - 04/2019**

•Bachelors in Computer Applications – 3.2 GPA
